

## CRUSH! What's Love Got to Do With It? PRICELIST 2020

Galeria Nepantla, represents exclusively Isis Rodriguez. Isis specializes in conflict resolution and uses the techniques of the great European masters to create new archetypes. These archetypes are placed in scenes creating a new mythology that represents current issues that affect us today. Isis has spent an entire year researching modern love by navigating dating apps like Tinder, interviewing her dates and single friends. Her interviews are stories of “the over 40 and frisky”, who’s heartbreaking stories of disappointments inspired her to create this show and bring awareness about the loneliness epidemic and how it can be solved. Her evening portraits, still lifes, and scenes are filled with symbols, combining her Mexi-Rican and American pop cultural icons, ie cougar pelts, bulls, black bows, crocodiles, egg cleansings, common aphrodisiacs that represent contemporary desires, fantasies and fears about love.
